“ Taking a moment to share some love for Dan, Joey, and Dan Goldfield for all the help. Here's what I've seen since working with you all:

- Increased newsletter sub rate by 4.2%*
- Had my most viral post ever*
- Increased average retweet per post from 2 to around 7-10*
- Rebranded my profile for more clarity*
- Created a digital product that has the highest beta test reviews of anything I've ever created.*

And we're just getting started.

Much love to all of you for the help. ”

Taylin Simmonds – **Creator & Founder Of Digital Identity**

WHO'S IT FOR?

If You Are A Writer, Creator, Or Beginner...

This community is for you if:

- You are writing and creating, but don't have a network of people like you to strategize, build, and grow with.
- **You don't understand the ins-and-outs of growing an audience, packaging up the information in your head, and selling it via the infinite scale of the internet.**
- You haven't started – and feel like all careers/business models are shallow, sleazy, and lack purpose.
- **You have started – but struggle to create your own niche, grow a loyal audience, or create original content.**
- You don't know what to write about on social media (so it gets shared and brings in like-minded people that want to buy your stuff).
- **You have multiple interests but don't how to talk about them all in an impactful way. You've been programmed to think you need to "niche down."**

- You already have a writing, marketing, or creator business but aren't confident in the quality of your social media posts, newsletters, or content as a whole.
- **You don't know how to merge what you love doing with a profitable product or service (to earn a living from your life's work).**
- You don't have a system for turning ideas into content, subscribers, and sales that can be maintained with 1-2 hours a day. (Once systemized, you have free time to build more.)
- **You are sick and tired of learning skills that lead to nowhere — and that you don't see yourself doing for more than 10 years.**
- You've gone through all of the free internet content on social media, branding, and online business but still can't seem to make things work.

WHAT'S INSIDE?

**Everything We Know About
Being A Creator In One Space**

- **The Creator Course** – go from beginner to intermediate as a creator. 45 lessons on viral content creation, creating your niche of one, and monetizing your brand with your expertise.
- **The Strategy Library** – A library of 80+ strategies, trainings, and templates for branding, content creation, and monetization that we've been building up for 3 years.
- **Signal Live Streams** – monthly live streams where the founders give one piece of little-known advice that leads to growth or revenue. This is followed by discussing common creator traps and Q&A.
- **Monthly Challenges (Testing)** – at the start of each month we will have a community-wide challenge for content writing, habit formation, and lever-moving tasks associated with being a creator so you are held accountable.
- **Monthly Templates** – get 5 content templates each month so you can refine your ideas, build more authority, and grow faster.

- **Content Drops** – we curate the best content we find (that have pulled in followers) so you can emulate them under your own brand. You don't need to worry about finding top performing ideas.
- **Questions & Forum** – Get help from our Kortex educators (trained in our methods and systems) on any question you have relating to any skill or topic as a creator. Never feel lost on what needs to be done to see progress.

COMMUNITY FUNDED

Why Are We Doing This?

In short, building software is expensive.

Very expensive (when you do it right and don't cheap out with no-code options).

We want to be community-funded.

We don't want to take on venture capital or external investments.

We want to be able to listen to your feedback and implement it fast. We don't want to monetize like other brands in unethical ways like selling your data.

At the same time, we don't want to ask for donations to build our software, we want to provide you with the most value you've ever seen in your life through the Creator Central community.

We've had a lot of interest in the second brain app we are developing for creators.

With something like this, we can't just "open the flood gates" and let everyone in (or else we break everything and people get mad).

What's Inside The Creator Course & Strategy Library?

These are the skills and topics you will learn in Creator Central. ***You can use these to build your own business, or use them as topics and skills that you teach and sell (with enough practice).***

- **Content Writing** – become a freelance writer, ghostwriter, or social media manager. Learn how to create short or long form content for social media.
- **Audience Building** – the one thing holding most businesses back from succeeding on social media.
- **Branding** – become a brand designer or brand consultant. Learn how to make your brand stand out by leveraging your personality.
- **Newsletter Writing** – become an email marketer, ghostwriter, or do guest posts in publications.
- **Lead Magnet Creation** – help people build their email list and land clients.
- **Digital Marketing** – understand promotions, audience nurturing, and product launches.
- **Offer Creation** – Create digital product or service that sells (like freelancing, consulting, cohorts, courses, eBooks, and more).

- **Sales & Funnels** – Learn the sales process and how to turn leads from cold to hot with qualification, emails, and manual outreach.
- **Copywriting** – become a funnel builder, write landing pages, and use persuasion to make more sales.
- **Combine Them All** – you can create irresistible offers that others can't compete with.

In Creator Central, you will learn all of the skills that turn you into a future-proof creator (if you execute with consistency).

WE WERE FED UP

The Founders Of Creator Central

A school you actually want to show up to.

Dan has been a brand advisor for 4 years. His students are some of the biggest names in the creator space.

He is now the author of The Art Of Focus and Co-founder of Kortex, a second brain software.

Joey is a social media ghostwriter who has created 500+ X threads and generated 300k+ followers for his clients.

He is also a performance consultant for entrepreneurs who has worked one-on-one with 100+ clients.

Matthew was previously awarded the Top 36 Startups of 2022 Award by Gen AI 36, and has worked as a software engineer at various early stage startups.

He has also scaled his income to multi-six figures by designing and building websites for high profile clients, such as world-famous pianist Bruce Liu.

We've been working with creators for 5+ years now.

With a combined 3.2 million followers, 20,000+ students, and 70,000+ content pieces between the founders, our ideas, systems, and knowledge have spread to shape the meta of the creator economy.

If you're on this page, there's a reason you got on this page, and it wasn't because you followed a paid ad to get here.

You're here because you *want* to be here.

We've gotten to a point in our own creator journey where we aren't really "competing" with others. We are focused on building a software business.

For that reason, we don't have anything to hide.

We know the strategies that will help beginners turn this into their life's work.

We are here to drop any and all knowledge we have related to the space so you can benefit from what we've learned.

Lock In Your Rate

GOT QUESTIONS?

We've Got Answers

Will I Get Access To The Kortex App When I Join?

No. As we close in on launch, we are only letting small waves of people join.

There are *a lot* of people who want access to the app. By joining Creator Central, you will be the first to hear about opportunities to get access.

At the moment, the only way to get access to the Kortex app is through the Writer's Bootcamp. Enrollment for that fills up quickly. You will be the first to get in on that at a discounted rate.

If you do not want to join the bootcamp, you will get first access during public launch. You will also be offered a discounted rate.

If I Cancel, Will I Have To Pay The Initiation Fee Again?

Yes. Like a gym membership, this community is best used as a part of your life, not something you just join and quit when you think you need it.

We want you to stay consistent for as long as you need us, then not feel as if you have to rejoin. Our goal is to get you to

a place of self-sustenance quickly.

Do I Need Any Prior Experience?

Nope. You can do this at any experience level. We have progressions for beginners and advanced students.

However, those who have been writing longer online will see faster results (in terms of audience growth and eyes on their ideas, writing, and products).

Do I Need Followers To Make This Work?

No. Everyone who has hundreds of thousands of followers now started at zero.

Especially those who didn't have any prior authority.

Social media is now a viable career path. Even colleges are catching on and trying to add "influencer" courses. These will fail, because colleges aren't creators.

How Long Will It Take To Start Seeing Results?

Every. Single. Aspect. Of. Life. **Is like a muscle.**

You will have to practice, put in the reps, and get better with time.

However, we can be confident that you will be a more impactful creator than 80% of them from the start.

It's not about the content itself. It's about readability, the structure of your writing, and your ability to connect with the reader. It's not about writing like Shakespeare.

For support inquiries, please email support@kortex.co and we will respond within 24 hours.

THE RUNDOWN

What Kortex University Looks Like

Watch this before reading on.

“ Taking a moment to share some love for Dan, Joey, and Dan Goldfield for all the help. Here's what I've seen since working with you all:

- Increased newsletter sub rate by 4.2%*
- Had my most viral post ever*
- Increased average retweet per post from 2 to around 7-10*
- Rebranded my profile for more clarity*

What's Inside?

The formal education system conditions:

- Convergent thinking
- Conformity over authenticity
- Memorization over process
- Failure as something to avoid
- Authorities as unquestionable
- Long work over efficiency and creativity
- Intelligence dictated by book smarts

And, people often report that they don't get a job in the industry they got their degree in.

And if they do get a job, they don't use what they learned in their degree.

One thing most people don't realize:

The old economy created the jobs available to it.

Meaning, the new economy created the opportunities within it.

Creators are the ones creating new jobs.

You can only learn how to get results from those that have results.

You cannot, and will not, learn this material in school.

We have structured Kortex University to be a learning experience that gets results:

People are losing trust in the system.

The shift to online education has already begun.

From institution to individual.

Centralized to decentralized.

Can you see it happening all around you?

- YouTubers are providing free information that formal universities can't compete with.
- Instagram accounts that you love and learn from are growing massive followings (you probably know as much as them on the topic).
- X accounts that use nothing but writing to build massive leverage (they don't have to post shirtless pictures to build a following).

"I've learned more on X in 6 months than I ever did completing my 4 year degree."

I think it's safe to say that the future belongs to those who take advantage of this mental & financial wealth transfer.

That is to say — those who pursue their curiosity, learn to build, learn to sell, and learn to capture attention in the age of opportunity.

This is the path of The Synthesizer.

Someone who:

- **Pursues their own goals, not the ones society assigned to them.** Money comes from solving problems. So solve your own and sell the solution.
- **Collects valuable information along the way.** They post this information as internet content to attract an audience that they can help most.
- **Creates a product from personal experience.** The biggest mistake is to try to solve a problem you haven't experienced. Sell the path the reach the goals you achieved. That's how you make a meaningful income.

Synthesizers are the new education system.

You are building an education business.

Education is what improves peoples lives and goes on to impact society and culture.

The benefit is that information products and services **cost \$0 to create and have 95%+ profit margins.**

Evolution favors the profitable.

If you have dreams of starting a company that requires massive capital – start here.

Then use your audience and income as leverage to build whatever you want.

1) If You Have These Values, This Career Path Is For You

You will not make it far if you do not have (or adopt) these values:

- Money is a tool for building what you want but doesn't yet exist. Not for fancy cars and mansions.
- If you don't create a career, you will be assigned one. And you will be guaranteed to hate your work.
- Personal responsibility puts you in full control over the outcome of your life.
- Curiosity and obsession will take you further than trying to learn the "most profitable skills for this year."
- There is a path to build the life you want with technology and the internet – especially as the creator economy continues to boom.

2) You Must See The Internet For What It Is

"If the work doesn't require creativity, delegate it, automate it, or leave it." – Naval

62% of labor jobs will be phased out in the next 10 years.

If you don't plan on being a coder, the only other option is becoming a one-person media company.

Synthesizers are decentralized media companies.

Everything that can be done on the internet will be done on the internet.

The back end of the internet is code.

The front end of the internet is content.

Writing is the foundation of content.

Tweets? Writing.

Threads? Writing.

Newsletters? Writing.

Blog posts? Writing.

YouTube videos? Done best with written scripts.

Instagram reels and TikToks? Like reading well-written tweets.

Images on Instagram? Usually designed from a well-written quote or saying.

Captions on any platform? Writing that results in the most followers and conversions (the content itself doesn't do that.)

Any other form of online marketing, advertising, or entertainment? Starts with writing.

The list goes on.

There's a reason we've been able to build multiple businesses without showing off our bodies or even our faces:

High-impact digital writing.

This is the foundation of The Synthesizer career path.

3) Skills You Must Acquire

Writing is the greatest skill of the 3rd millenium.

But you can't stop there.

In Kortex University, we have structured the program to help you acquire an irreplaceable skill stack that is *amplified with your unique interests*:

- **The Meta Skills** – code and content. You will understand how to leverage technology without learning to code.
- **The Evergreen Skills** – writing, speaking, marketing, and sales so you don't become a starving artist. If you don't want to sell because it's "scammy", good luck selling for someone else like you are already doing.
- **Results Oriented Skills** – these are technical skills like email marketing, graphic design, and anything else required to build a business (or get paid helping someone else build theirs).
- **Personal Interests** – your personal interests are what create unique content and products that stand out.

4) The Synthesizer Lifestyle

*If you can spend 8 hours building someone elses dreams,
you can spend 1 hour building your own.*

**You can become a synthesizer in as little as one
hour a day.**

Nuance: if you only have one hour, you won't be able to do everything at once. It may take longer than those with more time available to them.

Clearly, this will increase with time as you get results.

If you are okay with forming these habits, this program is for you:

- **Daily Focused Work** – a minimum of 1 hour dedicated to lever moving tasks that achieve your goals.
- **Daily Writing** – your first lever is writing to attract an audience. Once you build an audience, you can build whatever you want.
- **Researching New Information** – Yes, reading books, listening to podcasts, and studying (not consuming) social media IS a part of your work.
- **Building Potentially Profitable Projects** – when you are ready, you must make the time to build a product that may fail. You can't improve without failures.

If you can do this for 6-12 months, there is no reason this can't become your full time career.

5) You Are The Most Profitable Niche

The biggest problem in modern business is "finding a niche."

We aren't fans of "finding," we are fans of *creating*.

Most people don't realize that they belong to a very specific niche.

And you buy things every day.

So, why don't we skip the complicated customer avatars and market research and just write, build, and sell to ourselves?

There are 4 macronutrients of business:

ENROLL TODAY

**Receive A Lifelong Network &
Education For The Future Of**

work

Certainty in a time of uncertainty.

Remember, we are not training you into a job.

We are giving you the tools to create your own career.

Meaning, social media as a digital society cannot get "saturated."

Traditional schools create the illusion that you get to choose your own path.

But you end up getting trained into the same few (and outdated) jobs available in the old economy.

We've built Kortex University to be the first-of-its-kind.

You get to choose your own path, have a network that helps you grow, and have opportunities come to you as you name gets spread.

Another thing:

Remember that this is a personalized service.

While saturation in the new economy is rare, our program is limited in how many we can help.

We don't want to take on more than our team can handle.

HOW TO ENROLL

Speak With Admissions

To enroll, you must send a message to an Admissions Specialist on Telegram (a secure messaging platform).

This allows us to speak with applicants so we know who we are letting into Kortex University.

Here are your 2 options for what message to send:

1) "I'm ready to enroll"

If you have read the information and aren't worried about the price, this option is for you. You already know you can benefit from this experience and don't want to waste time.

2) "Send me pricing"

If you have a question about the program, our Admissions Specialist can answer it for you. We will send over a pricing document and you can ask away.

For clarity...

If you are ready to enroll, send a message to our Specialist with the link below saying "I'm ready to enroll" and we will take it from there.

THANK YOU

You're Start Date Is January 1st

Thank you!

FIRST: if you do not receive an email with login details (1) be sure to check spam (2) please email *support@thedankoe.com*.

DMs may not get answered as I have a sea of them to sift through across 4 platforms.

Now...

This course has been 3 years (of trial and error) in the making. I know you'll love it.

You will receive an email within a few minutes detailing what to expect along with your **login information to the course dashboard**.

Since I'm supposed to upsell people on stuff, you may find interest in joining Modern Mastery to supplement your learning.

It's a community with 180+ branding, social growth, marketing, and performance strategies and trainings.

It is also the perfect fit for getting feedback on your writing, finding others you can network and grow with, and learning how you can make this a full-time thing.

Join Modern Mastery

THANK YOU

You Have Successfully Been Added To The Digital Economics Waitlist

The next cohort begins on **June 14th**. Please double check your email for a welcome message, confirm that you received it, and be sure to drag it out of spam (if it landed there) so you get updates on the next cohort.

Want to get a head start?

Download the free 7 Days To Genius Ideas Challenge by clicking the button below (this is a pre-requisite for qualifying for the course).

Take The Challenge

GAIN ACCESS

**One More Step! Enter
the email you
purchased with
below.**

Since this course is not on Gumroad, you will have to enter the email you purchased with below.

This will authenticate your purchase with the membership dashboard, redirect you, and send login information to your email.
